

Pre-hearing disposition problem work around:

Opening large PDF documents, in particular some prehearing dispositions, can be problematic.

If you are having difficulty opening such documents, you may find this work-around helpful:

1. Right click on the file in question
2. Select "Save Target As"
3. Pick a location on your local system and select "Save"
4. In the download complete dialog box that follows, click on "Open"
5. The document should open in your Acrobat application

The document should now be viewable and searchable without problem.

The saved copies may be discarded at your discretion.
